

ScheduleSoft Selects Neoris as Regional Reseller of Its Workforce Scheduling Software

Global IT Consulting Firm to Deliver ScheduleSoft in Latin America

MIAMI & MADISON, WI, August 10, 2011 – Neoris, a global business and IT consulting company that specializes in SAP and application outsourcing, is partnering with ScheduleSoft to introduce the company's workforce scheduling software to Latin America. The news was announced at the SAP Latin America Partner Summit, August 9 – 12, Riviera Maya, Mexico.

Because many businesses have heterogeneous payroll, HR and ERP environments, ScheduleSoft provides a highly focused solution that can leverage and extend the benefit all these disparate systems to deliver labor schedules that match production requirements. As a strategic partner, Neoris will incorporate ScheduleSoft into its core solutions portfolio. As a global firm with 3,500 employees, Neoris will implement ScheduleSoft workforce scheduling in key sectors including consumer goods and food manufacturing, public sector, energy and transportation.

"Neoris was selected as a reseller partner because they have specific regional knowledge in Latin America combined with deep technical knowledge of SAP," said Gregory Flessas, ScheduleSoft's founder and CEO. "As Latin America emerges as a growing market, we are seeing strong demand for our solution. Neoris and ScheduleSoft will work together to meet the demands of customers, primarily manufacturers, who want to become more agile and improve how they plan their operations and leverage their workforce."

ScheduleSoft integrates with both Enterprise Resource Planning (ERP) systems and Time and Attendance systems making it easy for front-line managers to connect with critical business information allowing them to support the organization's strategic business goals. ScheduleSoft is robust enough to meet the requirements of the most complex work environments, and flexible enough to address changing business needs. In addition, because it is rules-based and configurable, the solution can accommodate the unique run-rules and labor standards of any particular facility.

"Because labor represents the largest percentage of any organization's controllable costs, many manufacturing companies have come to realize that there are significant benefits to implementing automated workforce scheduling," said José Antonio Hernandez, CTO of Neoris. "As a leader in Latin America, Neoris knows the market – country by country, sector by sector – which enables us to help customers and prospects turn workforce scheduling into a competitive differentiator."

We look forward to bringing ScheduleSoft to market in Latin America for the benefit of Neoris customers and prospects around the globe.”

Both companies are active partners of SAP. ScheduleSoft is an active member in America's SAP User Group (ASUG), and the ScheduleSoft solution has been certified to integrate with SAP® solutions. Neoris is an SAP Global Services Partner, and in addition to its seven nearshore solution centers in Latin America and Europe, the company operates five Centers of Excellence for SAP solutions in Argentina, Hungary and Mexico.

About Neoris
